For information and questions about this map, available products associated with this FIRM including historic versions of this FIRM, how to order products or the National Flood Insurance Program in general, please call the FEMA Map Information eXchange at 1-877-FEMA-MAP (1-877-336-2627) or visit the FEMA Map Service Center website at http://msc.fema.gov. Available products may include previously issued Letters of Map Change, a Flood Insurance Study Report, and/or digital versions of this map. Many of these products can be ordered or obtained directly from the website. Users may determine the current map date for each FIRM panel by visiting the FEMA Map Service Center website or by calling the FEMA Map Information eXchange.

Communities annexing land on adjacent FIRM panels must obtain a current copy of the adjacent panel as well as the current FIRM Index. These may be ordered directly from the Map Service Center at the number listed above. For community and countywide map dates refer to the Flood Insurance Study report for this jurisdiction. To determine if flood insurance is available in the community, contact your Insurance agent or call the National Flood Insurance Program at 1-800-638-6620.

Base map information shown on this FIRM was provided in digital format by Maine Office of GIS (MEGIS). Orthoimagery was acquired between 2003 and 2005 at a resolution of 2-ft cell size, and from 1998 at a 1-m cell size.

Only coastal structures that are certified to provide protection from the 1-percent-annual chance flood are shown on

State of Maine Floodway Note: Under the Maine Revised Statutes Annotated (M.R.S.A.) Title 38 § 439-A, 7C where the floodway is not designated on the Flood Insurance Rate Map, the floodway is considered to be the channel of a

river or other water course and the adjacent land areas to a distance of one-half the width of the floodplain, as

measured from the normal high water mark to the upland limit of the floodplain, unless a technical evaluation

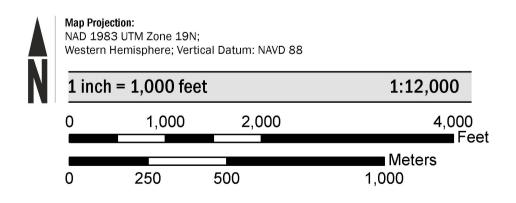

certified by a registered professional engineer is provided demonstrating the actual floodway based upon approved

this panel. However, all structures taken into consideration for the purpose of coastal flood hazard analysis and

mapping are present in the DFIRM database in S_Gen_Struct.

FEMA modeling methods.
